Contact No: - 9816335001, 9418608409 **Email id:** - cheshwer1979@gmail.com

Justification for locating the Project in forest land

This is submitted that the land for Stone Crusher has been allotted before enactment of FCA Act, 1980 in the name of M/s Bushahr Laghu Udyog by the State Govt. Since then the stone crusher was operational till 2014 and FCA was accorded in the year 2006 for a period of 15 Years.

The proposed mining area is located at khasra no. 13/1, falling in mauza-Pashada, Tehsil-Rampur, Dist.-Shimla, Himachal Pradesh, measuring 01-46-12 (Govt. Land). The said area has appraised by Joint inspection committee, Geological wings of Dept. of industries (Govt. of HP) and, on that basis of report, letter of intent has been issued vide letter no. Udyog-Bhu (Khani-4) Laghu-9/2015-5890 dated 26/08/2017. The proposed mining area is demarcated protected forest (DPF) land which covers with native bushes. The minerals i.e. stone is available in sufficient quantity in the applied for lease area to feed the already established stone crusher. the mineral available in the area is suitable for mining purposes. After the extraction of stone, mining area will be developed for the plantation. Project will generate local employment in direct and indirect way. It will also generate the state revenue. It is pertinent to mentioned here that out of mine lease area, khasra no. 14/1 (0-34 ha) and 22/1 (0-35-20 ha) has additional area propose for the approachable road and raw material stack respectively. Stone crusher is already established at Khasra no. 38 (since 1980) in the name and style of M/s Bushahr Laghu Udyog prop. Mrs. Kanegtu Devi and is 25 meters of proposed mine site. Further to inform that no non-forest land is available nearby for stone quarry to feed the existing stone crusher. With consideration of foresaid matter, it is justified that proposed mine area, raw material stacking area and approachable area to crusher site are required. The operation will be run sustainable process.
