JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST LAND

The Crusher is meant to provide aggregates of specified sizes obtained by crushing Boulders for construction of 2 - lanning with hard shoulders of Demwe - Brahmakund road from Km 0.00 to Km 18.464 on Demwe - Hawaii Road (New NH - 13) on EPC mode in the state of Arunachal Pradesh by NHIDCL. Final approval for construction of the road has been accorded vide no. FOR. 3 - 220/Cons/2020/3795 - 3801 Dated 22.09.2.21.

The entire belt is under notified forests area and non - forest area is more than 20 Kms far from the starting point of the road. The quarry proposed is nearby to the project site of Crusher Unit and Base camp which is also a part of notified forest area.

The Crusher Unit is required to be established nearby to the quarry to minimize the loss of time, money and labour.

Moreover, it being located far from human habitats, no harm will be done to human or their domesticated animals and environment.

The Base Camp is meant to keep the human resources for operating the quarry and the Crusher Unit which is obviously to be located nearby.

The extraction road is required to transport the raw materials from the Quarry Site to the Crusher Unit and then for transporting the finished product to the work site.

However, it is certified that due to settlement of labourers in the forest area, which is purely temporary in nature, no felling of trees/breaking of forest will be done. The labourers will guided to live in eco -friendly manner and alternative source of energy will be provided to them.

Hence proposed.
