NOTES :-

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g.,  $\Delta R$  represents the approximate height, in metres, between the top and bottom of a steep slope.  
Tanks shown dry, in this sheet usually contain water from October to February.  
Numerous wells and tube-wells exist throughout the cultivated portions of this sheet, some have been drilled for sake of clarity.  
Unmineralised rocks and carbitracts in this sheet are generally moisture in dry season.  
Temples with populations are shown thus:

#### NOTES

Heights are in metres and shown in brown ink on brown background.  
Contours are approximate.  
A relative height, e.g., 100, represents the approximate height in metres between the top and bottom of a depression.  
Elevations are measured from the mean sea level.  
The contour heights and elevations in this sheet have not been adjusted to the heights of the tide level based on the mean sea level and may not be strictly in accordance with them.
