

**Justification for locating the 132 kv single circuit transmission line on double circuit towers from Rengpang to Tamenglong in the forest.**

The project for the construction of 132 kv transmission line from Rengpang to Tamenglong is a part of establishing 132/33 kv transmission system in Tamenglong District Head Quarter in order to develop robust grid infrastructure to give a reliable and uninterrupted power supply system in Tamenglong District Head Quarter areas and its neighbouring villages. The route of this transmission line has to pass through the forest as there is no alternative route in between Rengpang and Tamenglong to avoid forest land. The proposed diversion of forest land for the construction of this transmission line is an area of 56.833 hectares.
