A relative height, e.g., 8r, represents the approximate height, in metres, between the top and bottom of a Chainage No. 114/605 A relative height, e.g., 30% against a well, indicates its total depth in metres. Cart-tracks, in this sheet, against which there is no descriptive remark are generally motorable (four-wheel drive). Tanks, in this area usually contain water from July to September. Limits of cultivation are variable and dependent on rainfall. About half the unlined wells in this sheet are 5 to 11 metres deep and contain rain water from July to March while the other half are covered tanks called kunds which usually contain surface collection of rainwater. Diggi is a tank which is used for collection of water. -26°2'30"N A Surveyed during 1958-59.
