NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 50, represents the approximate height, in metres, between the top and bottom of a steep slope.
Tide-gauges are numerous throughout the sheet, only the important ones have been shown.
Unmetalled roads and cart tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from irrigation authorities.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
