

### **IUSTIFICATION**

The Hojai district and other neighboring district of Assam has a huge shortage of quality stone for construction activities. The proposal for seeking operation of stone mahal of 5.42 Ha. area namely **LANGKAIJURI STONE MAHAL** inside the Doboka RF under Nagaon Forest Division will enable to cater the huge demand of stone materials. The total demand of stone materials of the District are too huge to meet from other Stone Mahal of the Division for which this site is very important. Hence, the site is selected in Doboka RF for the proposed Stone Mahal to extract quality boulders/stone for use/supply in the different developmental activities of Government, Semi Govt. and also private requirement of Hojai District and other neighboring district of Assam.

In view of the above, it is justified for locating the project in the aforesaid forest area.
