Proposed Non-Forest Land

REFERENCE NOTES:-

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 40, represents the approximate height, in metres, between the top and bottom of a steep slope.  
The kilometre stone numbers along roads, railways and canals are shown in slant type, e.g., '5', whereas milestone numbers are shown in upright type, e.g., '5'.  
Unmetalled roads and cart-tracks in this sheet are motorable in dry season. Permission to use those above along canals is required from the irrigation authorities.  
Wells are numerous throughout the sheet; only the important ones have been shown.  
A relative height, e.g., 40, marked along canal, indicates the height of the top of the canal embankment of the adjacent country.  
The common boundaries of the Reserved Forests in this sheet, have not been shown for want of reliable information.  
Tanks, shown dry in this area, usually contain water from July to January.  
The district boundary in the Ganga River follows the main deep water channel and will change with the fluctuations of that channel.
