

## Justification

HVPSNL is constructing a 400 kV D/C (Twin Moose) Kirori to Khatkar (Jind) Transmission Line from 400/220kv Substation (HVPSNL) from Kirori to 400/220 kV Substation (PGCIL) to Khatkar (Jind). The construction of line is very critical to improve the supply positioning Hisar & nearby areas. The proposed route is most feasible and necessary forest land has been avoided but while crossing Roads, Canals etc. it is not possible to avoid the forest land along with it. So the minimum forest land has been used for the construction of the transmission line & also it is stated that this route is most appropriate route.
