

## JUSTIFICATION

The PWD road "Raruan to Fagu via Ghagarbeda" starts from Raruan (Raruan Block head Quarter ) traverses through good number of villages inhabited with a large number of schedule cast & schedule tribe people via Ghagarbeda & connects Champua. Presently this road is ODR category having 3 meter width carriageway which is insufficient to cater the increased volume of traffic. This road is the lifeline of the tribal people for movement and transporting of their agricultural and forest products to nearby town. Apart from above , also the iron ore from mines at Suleipat, Badampahar and Gorumahisani are being transported to Jharkhand through this route. Therefore this road has been proposed to be strengthened and widen to double lane standard under CRF grant. After completion of the project thousands of villagers residing in the vicinity will derive immense benefit such as in their communication, transportation of agricultural products and forest products to nearby town for sell and the socio-economic standard of the people will be improved.
