

Magnetic Variation from True North about  $\frac{1}{4}^{\circ}$  West in 1975.  
(Decreasing by about 1' annually).

Contours are approximate.  
A relative height, .8r., represents the approximate height, in metres, between the top and bottom of a steep slope.  
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The district boundary between Haziribāg and Rānchī Districts has been surveyed as pointed out by the local officials on the ground but has not been verified by the District authority of Rānchī District.

Classification of forests, e.g., R.F.F.F. in Haziribāg District has not been entered in this sheet for want of information.

Forest boundaries in Rānchī District have not been shown in this sheet for want of reliable information.
