Justification for locating the Project road in Forest Land.

The proposed project is an up-gradation of existing road to 2lane with paved shoulders/4 lane configuration from BRT Tiger Reserve Boundary-Bangalore Section along with geometrical improvements as per IRC guidelines. The existing project road passes through Uttaramanavarthi Kavalu state forest as given in following table. As there is an increase in traffic volume along the existing road, existing road need upgradation to 4 lane configuration with proposed ROW of 45m. The proposed alignment follows the existing alignment to the maximum possible without compromising safety and technical aspects. The alignment within the forest area suits the existing topography and forest land diversion is the minimum required. Any other alternative chosen for the project shall involve acquisition of more private, government and forestland.
