NOTES

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, Δh , represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre scale numbers along roads and railways and contour lines are in black type, e.g., 5, whereas the numbers are shown in red type, e.g., 52.
Cart-tracks and unmetalled roads in this sheet are generally metalled in dry season. Permission to use these along tanks is required from the irrigation authorities.
Tanks, shown dry in this sheet, usually contain water from July to March.
A relative height, e.g., 60, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Wells and tube-wells are numerous throughout the sheet, only the important ones have been shown.
