

## **COST BENEFIT ANALYSIS**

The Double BG Railway line between Yelahanka and Penukonda will benefit the entire community along the corridor by way availability of a reliable transport infrastructure facility.

With an expected quantum of goods traffic 16 lakh tones per year and good passenger traffic, It will develop the prospects of new industry/trading activities and reduce the travelling time between major cities of Karnataka connected with Bangalore and other parts of the country.

Movement of finished agricultural and industrial products will be faster and economical.

By providing safe and fast route for the movement passenger and freight, it will decongest road traffic.
