SURVEY OF INDIA

1st Edition 2007.

CONVENTIONAL SYMBOLS

NOTES :-

A relative height, h , represents the approximate height in metres, between the top and bottom of a steep slope.
 All contours and unclassified roads in this sheet are generally metrised in dry season. Permission to use these along roads is granted from the respective authorities.
 A relative height, h , marked along a canal indicates the height of the top of the canal embankment above the adjacent country.
 Ticks shown on this map usually indicate water from July to December.
 Canal distance shown along the CANAL (GANDHAR CANAL) are 1000 feet apart and every existing 1000 feet is shown along the CANAL (GANDHAR CANAL) lines are 1000 feet apart and every existing 1000 feet is shown.
 Water levels are shown throughout the sheet, only the important ones have been shown.

COMPILATION INDEX

A. Surveyed during 1956-57. Updated for the major details during 2005-06.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° East in 2005.

Decreases by about 1° annually

1:50,000

Scale 1:50,000
