CONVENTIONAL SYMBOLS

- Express highway with bit, with bridge, with distance stone... Roads, metalled according to importance... Streams with track in bed, undefined, Canal... Dams: masonry or rock-fill, earthwork, weir... Walled tank, unfilled, Tube-well, Spring, Tanks permanent, dry... Embankments: road or rail, tank, broken ground... Railway, broad gauge: double, single with distance stone, double... Contours with sub-features, Rocky slopes, Cliffs... Towns or Villages: inhabited, deserted, Fort... Hut: permanent, temporary, Tower, Antiquities... Temple, Chhatra, Church, Mosque, Igah, Tomb, Graves... Lighthouse, Lightship, Buoy: lighted, unlighted, Anchorage... Mine, Vein on trails, Grass, Scrub... Palm: palmier, other, Plantain, Conifer, Bamboo, Other trees... Areas: outwashed, wooded, Surveyed tree... Boundary, international... Boundary pillars: surveyed, unlocated... Heights, triangulated: station, point, approximates... Bench-mark: geodetic, tertiary, canal... Post office, Telegraph office, Overhead tank... Rest house or inspection bungalow, Circuit house, Police station... Camping ground, Forest reserve, protected... Spoken names: administrative, locality or tribal... Hospital, Dispensary, Veterinary, Hospital / Dispensary... Asylum, Helipad, Tourist site... Power line: with pylons surveyed, with poles unsurveyed.

REFERENCE

AN 29 National Highway No. 25

NOTES:-

Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height e.g., 50, represents the approximate height, in metres, between the top and bottom of a steep slope. The kilometre scale numbers along roads, railways and canals are shown in upright type, e.g., 37 whereas kilometre numbers are shown in upright type, e.g., 12. Walls are numerous throughout the sheet, only the important ones have been shown. A relative height e.g., 50, marked along a canal, indicates the height of the top of canal embankment above the adjacent country. Unmetalled roads along branch canals and distributaries are shown by cart-track symbols. These and other cart-tracks along canals are generally motorable in dry season. Other cart-tracks against which there is no descriptive remark, are jealously in dry season. Permission to use these along canals is required from the irrigation authorities. Tanks, shown dry in this area, usually contain water from July to December.

COMPILATION INDEX: A Modern Survey 1973-74. Updated for major details during 2005-06 and administrative boundaries updated during 2007-08.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 0° in 2005. (Increasing by about 1' East annually).

1:50,000

CONTOUR INTERVAL 20 METRES

NOTES:

Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height, e.g., 20, represents the approximate height, in metres, between the top and bottom of a steep slope. The traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them. All cart-tracks along canals are usually waterable in dry season whereas other cart-tracks, against which there is no descriptive remark, are generally passable in dry season. Permission to use these stony canals is required from the irrigation authorities. The kilometre shows numbers along railways and roads are shown in italic type, e.g., 10, whereas milestone numbers are shown in upright type, e.g., 10. Parental streams in this sheet are generally fordable from October to June at the places indicated as such. Tanks, shown dry in this sheet, usually contain water from July to December. Wells are numerous throughout the sheet, only the important ones have been shown. The district boundary in the Yamuna River follows the main deep water channel and will change with the fluctuations of that channel.

**NOTES**

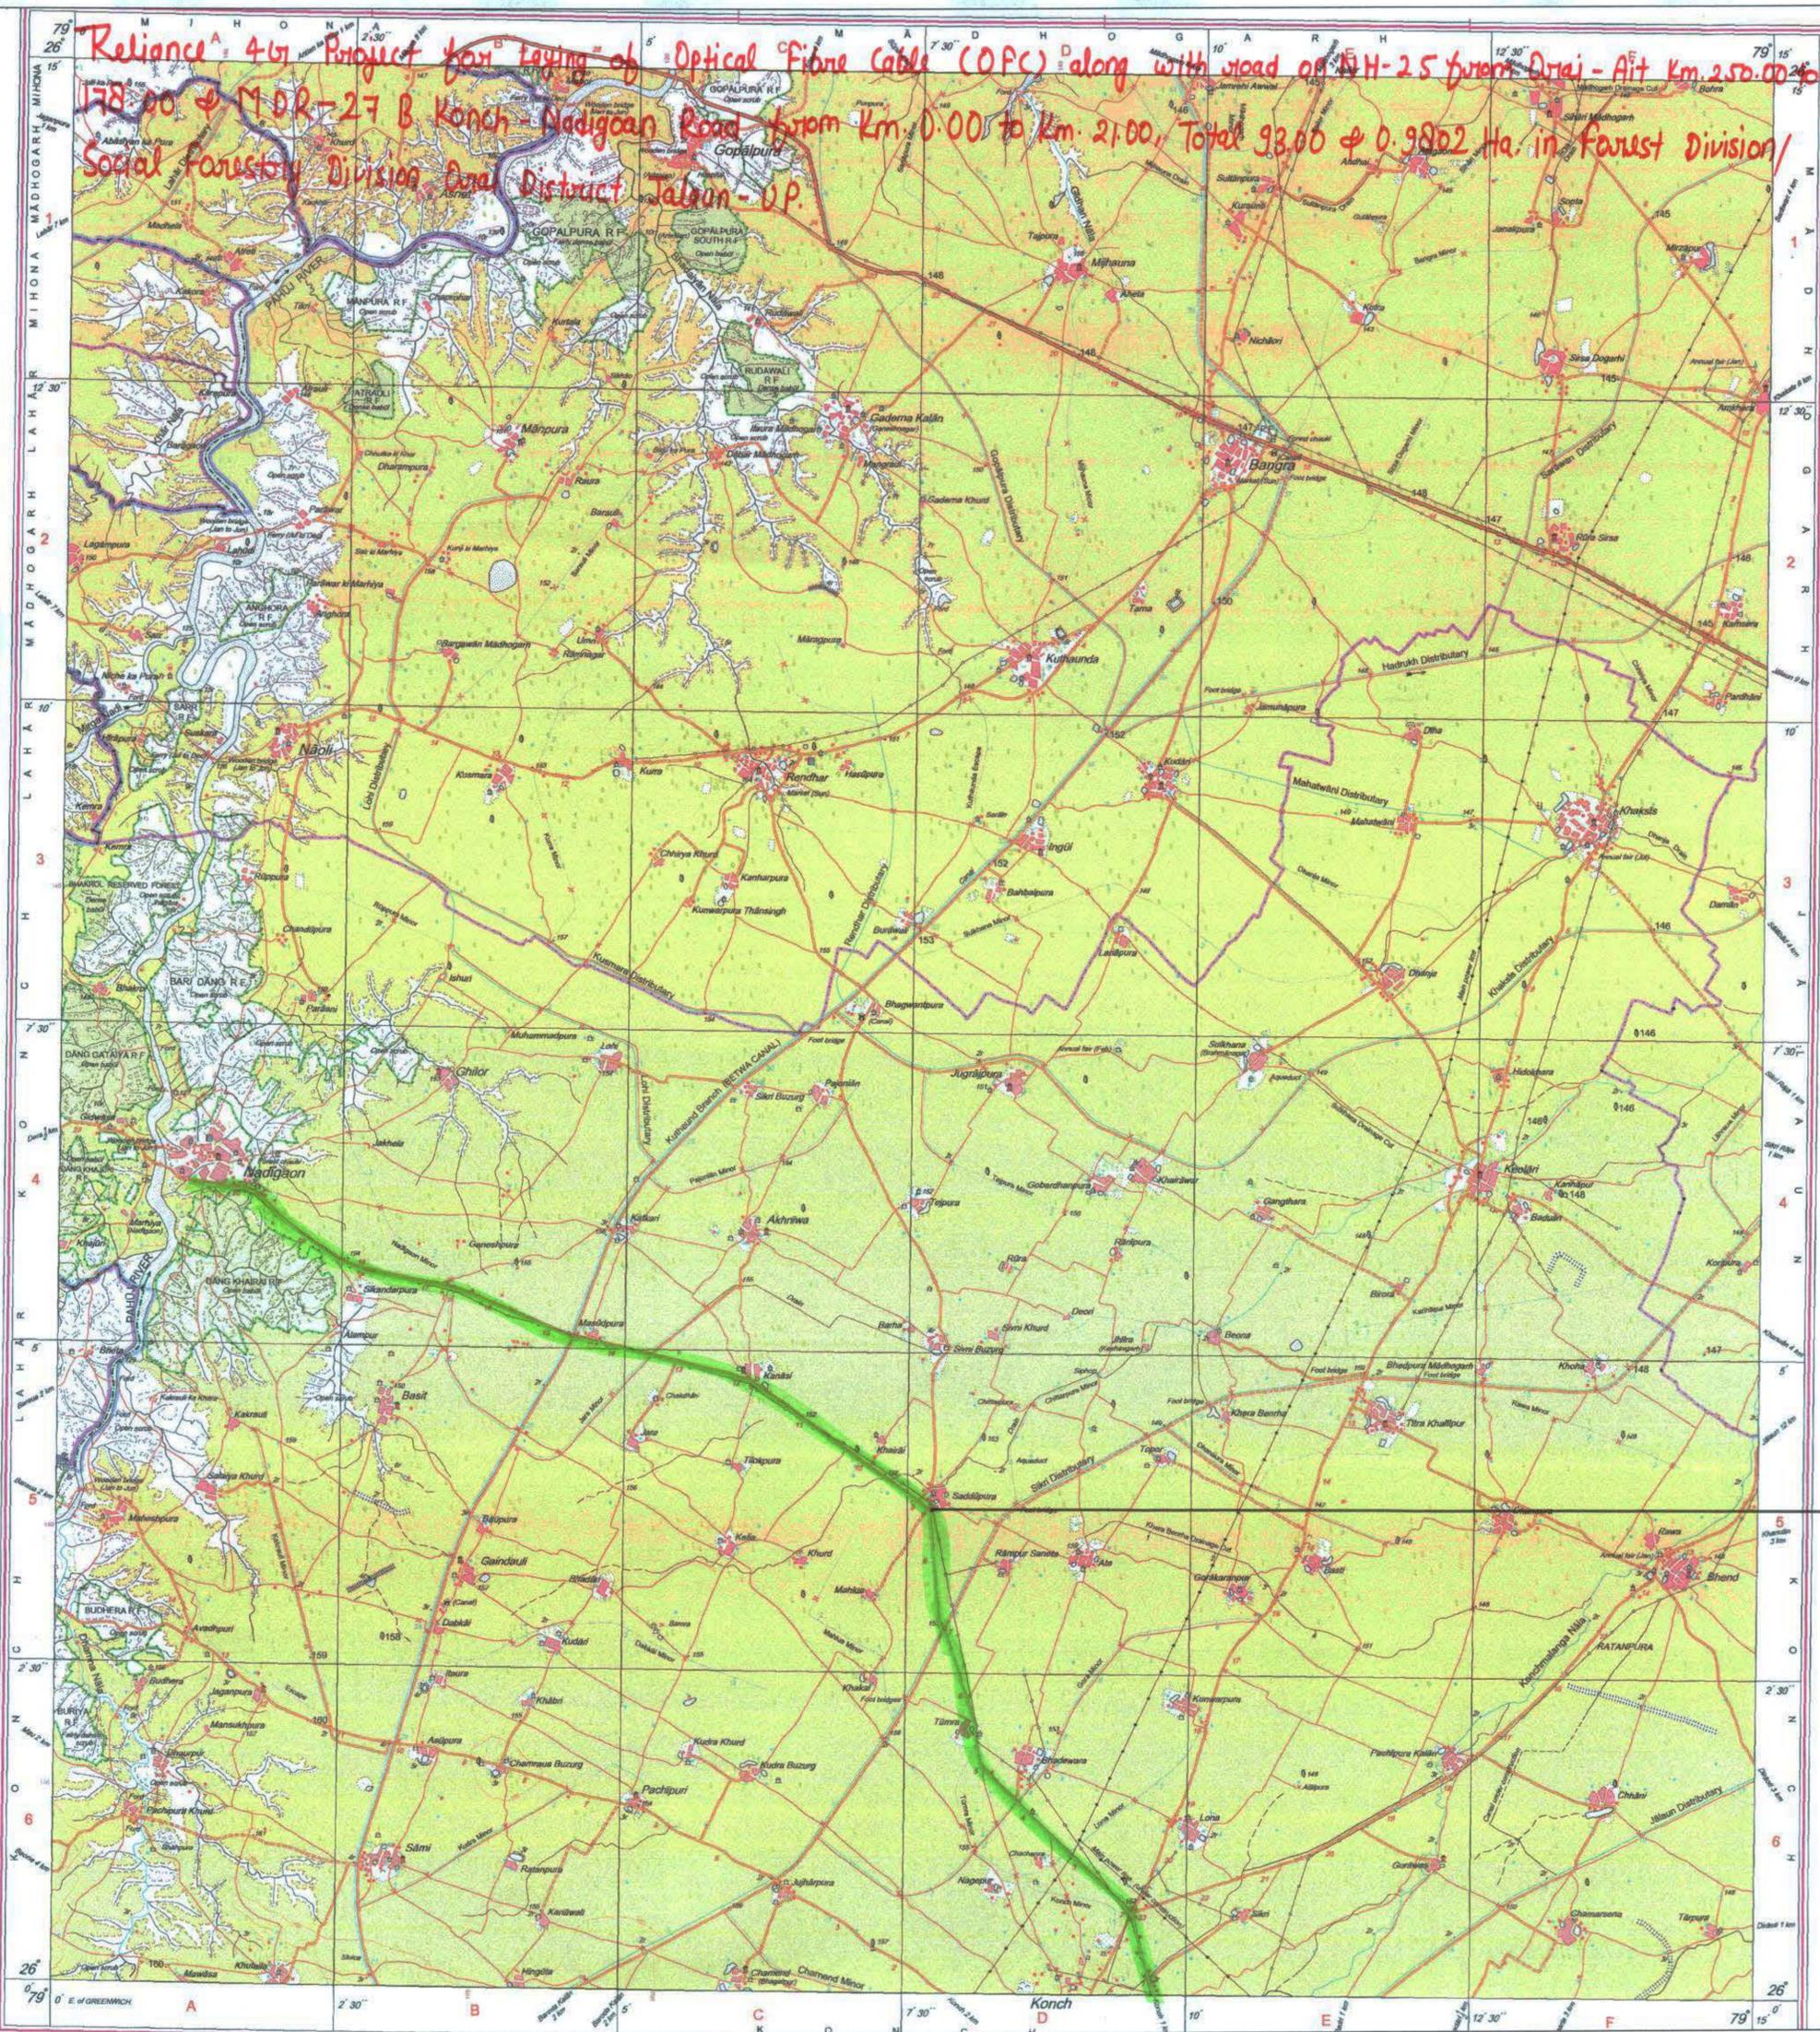

Heights are in metres and above Indian mean sea level.  
 Contours are approximate.  
 A relative height, e.g., 25, represents the approximate height, in metres, between the top and bottom of a steep slope.  
 The kilometre scale numbers along roads and canals are shown in solid type, e.g., 2, whereas milestone numbers are shown in upright type, e.g., 15.  
 The unmetalled road along Kothari Branch (BETWA CANAL) and cart-track along other canals are usually mettable in dry season. Permission to use these is required from the Irrigation authorities.  
 A relative height, e.g., 25, marked along canal, indicates the height of the top of the canal embankment above the adjacent country.  
 Perennial streams in this sheet are generally fordable from October to June at the places indicated as such.  
 Tanks, shown dry in this area, usually contain water from July to December.  
 Wells are numerous throughout the sheet; only the important ones have been shown.  
 The state boundary between Madhya Pradesh and Uttar Pradesh States has been surveyed as pointed out by the local officials on the ground but has not been verified by the Government concerned.
