

## ANNEXURE D-I

### **Justification for locating the Project in Forest Land and Details of alternate examine:**

The mobile telecommunication towers are always erected on suitable place for easy communication feasible, easy supervision, quick maintenance and low cost of maintenance. The applicant has to acquire meager land for this project purpose, as the land is under the control of forest department.

The area requested for the erection of telecommunication Tower is the minimum considering the requirements and also considering the safety of the assets so erected. Since the system of telecommunication tower passes the communication from the Government Offices, Defence & Strategic Establishments and from the different industrial organizations apart from the general public, for the safety and confidentiality of the conversation so made it is not advisable to erect such important Telecommunication towers cables on the private land belonging to different parties.

The erection of such towers will be suitably installed to avoid any cutting of trees.

The area required for the erecting the Telecommunication tower is bare minimum which is a part of the protected forest land.

No alternative was considered as the project is site specific.
