

PROPOSAL FOR GRANT OF PERMISSION FOR LAYING PROPOSED 63mm DIA PE GAS PIPELINE ALONG & ACROSS SH-76(BHARUCH-ANKLESHWAR) FROM TAP-OFF POINT (on EX.90mm Ø PE GAS PIPELINE) TO LOVELY SWEET CORNER & FROM TAP-OFF POINT (ON PROPOSED 63mm Ø PE GAS PIPELINE) TO DARSHAN HOTEL IN TALUKA- ANKLESHWAR, DIST. BHARUCH OF BHARUCH GA – PROPOSED DIVERSION AREA : 0.0030Ha).

Justification for locating the project in forest area to be submitted by user Agency and countersigned by DCF

JUSTIFICATION FOR PROJECT

In consideration of the requirements of Environmental parameter, constructions methodologies to be adopted for different terrain encountered en-route, design and engineering factors, availability of logistic support during construction, operation and maintenance of pipeline, various feasible routes were identified by the Consultant **M/s. Deshpande-Patil Consultants** based on Desk Study of relevant topographic maps of Survey of India. The study was subsequently supplemented with field reconnaissance and data collection along the feasible routes. Finally the optimum route was arrived at after analyzing the various data and conducting in depth study of topographic maps based on field data.

The respective route passes Along and Across SH-76(Bharuch-Ankleshwar) in Taluka- Ankleshwar, Dist. Bharuch of Bharuch GA. as said herein above to provide Piped Natural Gas to **CNG, Domestic, Commercial and Industrial customers in Taluka Ankleshwar of District-Bharuch**. The Pipeline will be laid at minimum 1.2 m below ground level and as per the requirement of the authority.

The pipeline will be passing through protected forest land for about **30.00** Sq.mtr. i.e. **0.0030Ha** of land as per enclosed **Annexure - 7**.

Factors considered

While identifying the various alternatives for selection of the optimum route following factors were considered.

- **Pipeline route has been finalized in such a way that minimum forest land will be utilized as well as tree cutting will be minimum.**
- Demand and supply center.
- Compliance with environmental regulations.
- Safety of people and property.
- Shortest possible pipeline length.
- Minimum number of bends.
- Favourable ground profile for pipeline hydraulics.
- Accessibility to pipeline route during construction, maintenance and operation.
- Location of pipeline facilities and access thereto.
- Avoidance of mining protected and reserved forest archaeological and other sensitive areas.
- Avoidance of unstable ground features.
- Minimizing road, rail, rivers and flood prone areas.
- Avoidance of rocky stretches.
- Avoidance of areas reserved for planned future development.
- Flexibility for future expansion.

Based on the above detailed route surveys have been carried out to finalize the exact corridor for laying the pipeline.
