NOTES

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 5, represents the approximate height, in metres, between the top and bottom of a steep slope.  
The kilometre stone numbers along roads and railways are shown in slant type, e.g., 5, whereas milestone numbers are shown in upright type, e.g., 5.  
A relative height, e.g., 300, against a well, in blue, indicates its total depth in metres.  
Tanks, shown dry in this area, usually contain water from July to December.  
All cart-tracks and unmetalled roads in this sheet are generally motorable in dry season. Permission to use the cart-track along Chhapra Minor is required from the Irrigation authorities.  
The traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
