NOTES :-  
Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height e.g. 40 marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.  
Tanks shown dry, in the case usually contain water from July to March.  
A relative height e.g. 20 represents the approximate height in metres between the top and bottom of a steep slope.  
Unmetalled roads and cart-tracks in this area are generally metalled in dry season. Permission to use cart-tracks along canals is required from the irrigation authorities.  
3,000-feet retriangulation stations of British Dam Project Survey are shown as tertiary bench-marks thus: -
