NOTES :-

Heights are in metres and above Indian mean sea level.

Contours are approximate.

A relative height, e.g., 3r, represents the approximate heights, in metres, between the top and bottom of steep slope.

A relative height, e.g., 3r, marked along a canal, indicates the heights of the top of the canal embankment above the adjacent country.

Tanks shown dry, in this area usually contain water from July to March.

Wells and tube-wells are numerous throughout the sheet, only the important ones have been shown.

Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from the Irrigation authorities.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

Yamuna River is liable to continual change owing to shifting of the river bed.

Forest boundaries in this sheet have not been verified by the Divisional Forest Officer concerned.

The state boundaries between Delhi, Haryana and Uttar Pradesh States have been surveyed as pointed out by the local officials on the ground but have not been verified by the Governments concerned.

The state boundary pillars between Uttar Pradesh and Haryana States were not physically found during verification survey 2005-06.
