Heights and Contours have not been shown.

A relative height, e.g., *5r* represents the approximate height, in metres, between the top and bottom of a steep slope.

Tanks. In this area usually contain water from July to November.

In areas, where no tube-well exists cultivation is periodic and dependent on rainfall.

Numerous field bunds of less than 2 metres in heights occur throughout the cultivated area.

A. Surveyed during 1987-08. Updated for major details during 2004-05.
