

Name of work: OFC laying work from Thano Telephone exchange to Narendra Telephone Exchange via Bhogpur & Dandi alongwith roadside.

JUSTIFICATION

At present long distance telecom traffic between Dehradun & Tehri-Garhwal is passing through Thano, Rishikesh and Narendra Nagar on very old Optical Fiber Cable. It is observed that in the past few years, the working OFC on this path has been cut / damaged at many places due to multiple development work (i.e sewer line work, road widening and construction of drain etc.) and thereby causing to heavy losses. These heavy losses are affecting the performance of telecom equipments and services. Further the "Rishikesh – Narendra Nagar – Chamba Road is under All Weather Road Widening Project". So an alternate OFC route is required between Thano Telephone Exchange and Narendra Nagar Telephone Exchange. Therefore in the 10TH RTPC vide letter no. 71-1/2018/Tech/Transmission Guideline/Part-I dated 14-08-2018 scheme placed at 10/DDN/1, it is approved to lay a new 48 F OFC from Thano Telephone Exchange to Narendra Nagar Telephone Exchange (via Bhogpur & Dandi).

As per instructions contained in 10TH RTPC vide letter no. 71-1/2018/Tech/Transmission Guideline/Part-I dated 14-08-2018 scheme placed at 10/DDN/1, the new 48F cable is to be laid from Thano Telephone Exchange to Narendra Nagar Telephone Exchange (via Bhogpur & Dandi) comprising of 28.5 Kms route length.
