

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

1. Construction and improvement of Bandipur-Gureiz road is under progress to meet the strategic needs as well as to provide communication to the peoples of border villages.
2. The 18 mtr (60 ft) Hamilton bridge of load classification 18R existing at Km 66.00 on Bandipur-Gureiz road is causing in convenience to smooth flow of traffic due to its less load classification, less width and shortage of span. Thus construction of pmt bridge to replace the old vintage bridge at Km 66.00 on B-G road is necessary.
3. The land for the proposed site of construction of the bridge fall under forest department, as such diversion of forest land has been necessitated. It has been assessed that about 0.25 Ha of forest land will be required for the said proposal. Since there is no other suitable site to construct the bridge, there is no other way to acquire land other than forest land.
