NOTES :-

Heights are in metres and above Indian mean sea level.

A relative height, e.g., -3r represents the approximate height, in metres, between the top and bottom of a steep slope.

The state boundary between Madhya Pradesh and Maharashtra states has been surveyed as pointed out by the local officials on the ground, but has not been verified by the Governments concerned.

Common forest boundaries have not been shown at some places for want of reliable information.

In Marathi names the lettered has frequently the sound of r, y invariably the sound of l, and v of o when otherwise placed.
