Contours are approximate.

Height are in metres and above Indian mean sea level.

The ungrated length of contour in this sheet has not been adjusted to the heights of the storm-troiled bench marks and may not be strictly in accordance with them.

Tracks shown are of the following types:

Unsettled roads and cart-roads along canals are notractable through the river. Permission to use these is required from the irrigation authorities. Other unmetalled roads and cart-tracks in this sheet are of the following types:

A relative height of $\frac{1}{2}$ or $\frac{3}{4}$ marked along a canal, indicates the height of the top of the canal embankment.

The area adjoining the Yamuna and Hindal Rivers are liable to change owing to continual fluctuation of the course of rivers.

Contours are not shown through the sheet; only the important ones have been shown.

Important buildings are shown in black with names.

A relative height, $\frac{1}{2}$ or $\frac{3}{4}$ represents the approximate height, in metres, between the top and bottom of a steep slope.

The small boundaries in Delhi State have not been shown in this sheet for want of reliable information. The boundaries of the States of Punjab, Haryana, Rajasthan and Uttar Pradesh are supported only by the local officials on the ground but have not been verified by the Governments concerned.

A. Compiled from 1:25,000 survey of 1992-94 and updated from rapid verification survey 2005-06.

Magnetic Variation from True North about $\frac{1}{2}^{\circ}$ East in 2000.
(Increasing by about $2'$ annually).
