NOTES

Heights are in metres and above Indian mean sea level.

Contours are approximate.

The triangulated & traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks, and may not be strictly in accordance with them.

A relative height, e.g., represents the approximate height, in metres, between the top and bottom of a steep slope.

Tanks, shown dry, in this area usually contain water from July to December.

The kilometre stone numbers along roads, railways and canals are shown in start type, e.g., 5.7 whereas milestone numbers are shown in upright type, e.g., 5.7.

Cart-tracks and unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.

The areas adjoining the Ganga and Yamuna Rivers are liable to change owing to continual fluctuations in the course of these rivers.

A relative height, e.g., 5.7, marked along a canal, indicates the height of the top of the canal bank above the adjacent country.
