

Justification for Locating The Forest Land

Proposed Alternative	Forest Land Approx. o.8o Ha.	Proposed Alternative :- With this alignment ,there is enhanced traffic safety,operational efficiency,fulfillment of access needs to population,minimal adverse impact on the road users,feasible and fulfilling norms of construction,economic benefits to local population during and after construction.Easy transport of agricultural products,goods & access to greater markets.Proper connection to fast track corridor Nagpur -Nanded National Highway.Easy access to health care and emergency services,improved of quality of life in the project region.Increased employment opportunity,enhanced & increased safety. This is site specific project involving barest unavoidable ,minimum forest area with lesser vegetation and lowest cost of project.Hence Construction of Minor Bridge is proposed on exisiting highway especially in valley region has no option & it is site specific one .	Alignment Proposed
		Hence,the above referred construction of Minor Bridge requiring diversion of Forest Land is recommended.
