

General Note regarding Justification of project passing through forest

This is Extra High Voltage electricity transmission line project transmitting power in Amravati district from 220KV Kalmeshwar substation to 220KV Warud substation. This project will meet power demands of people of taluka Warud of district Amravati. Due to this line, voltage up gradation in said area will satisfy power need for industrial, residential and agricultural area.

The route of transmission line connecting 220KV Katol substation to 220KV Warud substation is technically surveyed and approved in year 2008 avoiding any forest interception that time. But the project is near completion in 2021 during this period some of the land is observed to be forest land through which route passes. As the route was previously finalized and Part of the line was constructed it is not possible to change the route at this stage.

The proposed 220KV Kalmeshwar Warud Transmission Line, is passing through forest area at villages Tarabordi, Pardhi(Golmire), Bordoh, Pathar, Bhajipani, Dongargaon, Salai Ridi of Tchisil Katol of Nagpur District. The line is aligned as per technical requirements of line, which is passing through forest area of Katol Tchisil of Nagpur District. No non-forest land is available and forest area is bare minimum for the said transmission line.

(Forest land diversion 6.0760ha.)

Therefore passing of route through forest land is unavoidable.
