NOTES -

(Heights are in metres and above Indian mean sea level.)

Contours are approximate.

A relative height, e.g., 40, represents the approximate height, in metres, between the top and bottom of a depression.

The Monrovia slope numbers along roads, railways and canals are shown in slant type, e.g., 51 increases in the course of these lines.

Weils are numerous throughout the sheet; only the important ones have been shown.

Tanks, shown by, in this sheet, usually contain water from July to December.

The triangulated heights and contours in the sheet have not been adjusted to the heights of the spirit levelled bench marks and may not be strictly in accordance with them.

All cart lines and unmetalled tracks in the sheet are generally not visible in dry season. Permission to use these along tracks is required from the irrigation authorities.
