NOTE FOR END USE PLANTS FOR DEVADARI IRON ORE MINE

- (a) **Pellet plant:** The pellet plant is located at Mangalore close to New Mangalore Port Trust. Pellet plant was established in the year 1987. The installed capacity of plant is 3.5 million tons per annum. KIOCL is having expertise in operating travelling grate type pelletization plant. The iron oxide pellet is input feed to the blast furnace in steel plants. KIOCL's Pellet Plant is one of the premier Iron Oxide Pelletization plants having facilities like Roller Press, double-decker roller screens and dedicated grinding plants for grinding additives like Bentonite, Limestone & Coal. Ball mill grinding circuit was installed for grinding iron ore fines to make feed concentrate to pellet plant. Pellets produced are complying with International Standards for use in DRI and blast furnace for steel making.
- (b) **Pig iron plant:** The Blast furnace unit is established in the year 2001. Blast furnace unit has capacity to produce 2,16,000 tons per annum of foundry grade pig iron of various grades. Pig iron plant is located at Baikampady Industrial area, Mangalore. Plant has facility to receive raw material like iron ore lumps, coke, dolomite, etc., as well as dispatch of Pig Iron. The blast furnace unit has an area of 154 acres. Company has expansion plans to enhance the capacity of blast furnace unit in future for utilization of lump iron ore produced from the mines.

Utilization of Iron Ore and Manganese: - Production of ores from this mine will be consumed in Pellet Plant and Pig iron Plant at Mangalore. Iron ore fines/concentrate will be utilized in Pellet plant to make iron oxide pellets. Lumps generated out of this mine will be utilized in Blast furnace unit for making pig iron. The annual consumption of iron ore fines will be about 3.5 million tons in Pellet plant and lumps approx.4 lakh tons in Pig iron plant. Manganese will be utilized in the Blast Furnace for manufacturing of Foundry grade Pig Iron.
