

**Note Containing Justification for locating the project
in Revenue Forest Land at village Chameda in Nagri**

The proposal to establish 132/33 KV Sub-station at Nagri is approved By Honorable Electricity Regulatory Committee(C.G.Govt)in respective of providing uninterrupted and better quality electricity to Nagri and nearby areas which is in Dhamtari District an left wing affected area . This project will also provide electricity to upcoming industries.

In present scenario power supply to Nagri and nearby areas is through 33/11KV LT Line hence interruptions and losses are much more.

This project will help to overcome all the draw backs of 33/11KV line and can also provide employment to the local workers during its construction. Since the proposed land is best located for the incoming and outgoing of the transmission line with proper road connectivity. No other alternative place is found suitable for this purpose. Hence the project is formulated at the proposed land.
