NOTES >

(Height in cm; italics and asterisks indicate exact and 50% probability of occurrence, respectively)

A positive height in cm, *h*, represents the approximate height, in inches, required for the tree to be visible from a given distance.

For the same tree in this area, usually occurs within July to December.

Probability of occurrence based on data collected from the 1990-1991 period. It is based on the 1990-1991 period.

Probability of occurrence in this area is generally between July to October in June at various intervals.
