NOTES :-

Tanks, shown dry, in this case usually contain water from July to December.

Canal distance zones are 1000 feet apart and every existing fifth stone is shown.

Tube-wells are numerous throughout the sheet, only the important ones have been shown.

A relative height, e.g., 6*r*, marked along a canal indicates the height of the top of the canal embankment above the adjacent country.

Permission to use cart-tracks and unmetalled roads along canals is required from the Irrigation authorities.

A relative height, 8*r*, represents the approximate height, in metres, between the top and bottom of a steep slope.
