

III) The Project cost and justification for locating the project in forest land boundary area:

The project cost is Rs. 1316 lakhs. The project proponent has acquired 3.32 Ha of land out of 1.97 Ha is forest land which is the barest minimum required for the project.

The district has adequate facilities and support in terms of infrastructure required for this specific sector. Strategically, the plant is located only at 20 km from Cuttack. The site offers the best in logistic connections for any steel processing Unit. It has also the advantage of a well developed communication network encompassing an extensive road and electrified railway system with the rest of the state.
