HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water. Coloured areas are coloured pink. The interior boundaries of areas of Reserved or Protected Forests are shown by green ribbons.

The uncoloured heights and contours in this sheet have been adjusted to the height of the spirit levelled bench-mark and may not be strictly in accordance with them. The stations are shown along roads, railways and canals in the type 'a' or 'b' whereas other stations are shown in the type 'c' or 'd'. The area adjoining the Brahmaputra River is liable to change owing to continual fluctuations in the course of the river and is not shown during rainy season. All uncoloured roads inside the Tea Gardens are shown in dry season. Permission to use these roads is required from the Tea Garden authorities. Boundaries of Reserved Forests have not been shown for want of information. The alignment of the substation boundaries, shown on this sheet, are based on the information supplied by the Deputy Director of Survey, Assam, but have not yet been verified.
