

**IIP-MAIN CANAL-CONSTRUCTION OF LEADING CHANNEL AND
PROVIDING DI PIPE FOR RECHARGEING PUTHENKULAM IN
MALAYATOOR -NEELEESWARAM PANCHAYATH FROM
CHELACHUVADU SLUICE**

REPORT

Proposed project off takes from chelachuvadu sluice of IIP main canal and continues to Puthenkulam pond for a distance of 1750m , including forest land of 38.34 m length and 2.4 m wide. Since the topography of the land varies in different location, the alignment though the forest land is the best option to meet the start and end point of the proposed work. Hence crossing through the forest land is inevitable.
