REFERENCE
 1. *Ann. N.Y. Acad. Sci.* 1961; 157: 103-114.

NOTES -

are in italics & if above italic mean have been
used in appropriate

have dry in the area usually contain water up to March

numbers in squares 1, 2 & 3 only the important ones have been shown

are unutilized waste in the sheet, are generally indicated in dry season Permanent
have been forest areas in reserved from the Forest Authorities

have high, it represents the approximate height in meters, between the top and bottom
of forest

show some numbers along roads are shown in state type e.g. 12 reference telephone
are shown in upright type e.g. 1

the boundary between the Protected Forests are also shown for ease of reference information

4. Surveyed during 1975-76. Updated for major details.

Working 1987-88 on p. 11 (1988-89)

Projection - UTM Datum - WGS 84
Magnetic Variation from True North about $\frac{1}{4}^{\circ}$ West in 2005
(Increasing to about 1 annuim)

NOTES —

heights are in meters and some other means may be used.
 Comments are appreciated.
 Truly yours dry, in this case usually means water from July to December.
 Unseasoned woods and aridity in this place are generally measured in dry seasons.
 The current frequency of the *Prunella* *Prunella* at some places in this world has not been shown for most of visible information.
 A relative height, it represents the approximate height, in meters, between the top and bottom of any group.
 The entire knowledge of some of *Prunella* at *Prunella* *Prunella* are shown by some others.
 The information more numerous group, such as shown in other types, e.g., whereas relative quantities
