

## **JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA**

The project “**Removal of blind corner and straightening of approach road at Mongjam**” is required in order to make a safety corner for the approach IVR (Inter Village Road). The area happens to be an accident prone zone so we are suggesting a solution to this problem. Therefore, the forest area of 0.37 ha. is needed to be straightened along the direction of the road. This will make the people living in the area safe and better access to the road. In addition to this, it will lower the maintenance cost of the road and efficient mobilization of the people and goods.
