NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
Unmetalled roads and cart-tracks in this sheet are generally motorable. Permission to use those along canals is required from the Irrigation authorities.
Most of the unlined well symbols indicates covered tanks, called *Kunds*, which usually contain surface collection of rain water.
A relative height e.g., .30; against a well, in blue indicates its total depth in metres.
Canal distance stones are 1,000 feet apart and every existing fifth stone is shown.
Tanks, shown dry, in this area usually contain water from July to September.
Cultivation is periodic and dependent on rainfall in non-irrigated area.
A relative height, e.g., .2; marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
3,000-acre rectangulation stones of Bhākra Dam Project Surveys are shown as tertiary bench marks thus..... $\frac{S}{3}\frac{12}{333}$ BM 206·4 .
