HEIGHTS & CONTOURS IN METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green riblands.

Water features are shown in blue where they generally contain water.

Coloured areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forest are shown by green lines.

Contours are approximate.

A relative height, in metres, represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green but prominent surveyed trees are in black.

The sheets had been compiled from 13,000 surveys. The irregular heights and contours in this sheet have not been adjusted to the heights of the spot-released hatch marks and may not be strictly in accordance with them.

Tanks shown dry in this area, usually contain water from July to December.

All selected reefs are monogenic and structureless (popah in dry season).

Shallow water (less than 10 m) is usually covered by a dense carpet of *Sargassum* and *Ulva*.

The administrative boundaries in this sheet have been surveyed at plotted dry at the local officials on the ground, but there are no boundaries verified by the AVANGARDO BUREAU authorities.
