NOTES

Height in metres and above Indian mean sea level.

Contours are approximate.

A relative height, e.g., 40 represents the approximate height, in metres, between the highest point of the area and the lowest point.

Town, village, etc. in this map usually correct from July to January.

Unmetalled roads and cart tracks in this map are generally metalled in dry season. Permission to use these roads is subject to the permission of the local authorities.

The kilometre scale numbers along roads, railways and canals are shown in plain type, e.g., 10, whereas milestone numbers are shown in italics type, e.g., 10.

The area adjoining the Ganges River is liable to change owing to continual fluctuation in the course of the river.

The metalled & traverse heights in this map have not been included in the heights of the spirit-levelled bench marks and may not be strictly in accordance with them.

The district and tribal boundary in the Ganges River follow the main deep water channel and will change with the fluctuation of the channel.

COMPILED INDEX

A. Surveyed during 1975-76. Revised for major details during 2008-09 and administrative boundaries updated during 2012-13.

Date: 10/11/2013

Projection - UTM Datum - WGS 84

Magnetic Variation from True North at 0° in 2005.
