

Justification for construction of project

The villagers of these area has been using this footpath from many years. Their daily livelihood activities have been performing from this footpath only. Since the footpath alignment go through forest land where a stream across with the alignment and the villagers are compile to cross the river during monsoon by endangering their life. The constructing the bridge over the stream will not only provide easy access to the villagers but also help to enhance their social and economical condition. Hence, the project is located on the forest land.
