heights and contours have not been shown.
Important buildings are shown in black with notes.
The common boundary of the Protected Forests between Hengshui FF & Huidai FF is shown in
blue lines shown for want of reliable information.
A reliable height, e.g., 1000 meters the approximate height, is written, between the top and bottom of
steep slope.
A reliable height, e.g., 900, marked along a creek, indicates the height of the top of the creek bed
shown the adjacent slope.
The common boundaries in this sheet have been surveyed or passed over by the local officials
and have not been based on the Chinese records.
The town boundaries in this sheet have been surveyed or passed over by the local forest officials
but have not been submitted by the Ordinal Forest Offices concerned.
Local Forest areas shown in green.

COMPILATION INDEX

A. Compiled from 125,000 survey 1988-90. Updated for major details 2002-2003, 2005-06 & 2005-09 surveys and *Rethinking our Guide* & *examined 2005-08*.
