

Justification for requirement of Forest Land.

The existing footpath at Naulai Noyngali Block-3 is in a dilapidated condition and is used by several house-holds residing at the edge of the Reserve Forest Land. These holder-holds have no vehicular access, which places the residents of the area in great difficulty specially during medical emergencies, etc.

The construction of a black-topped road by widening the existing footpath would greatly benefit these residents specially at the time of medical and fire emergencies.

Further, the roads in and around this area are very narrow leading to traffic congestion. This proposed road when completed would greatly reduce the traffic burden at critical junctions thereby ensuring the smooth flow of traffic.
