5. & CONTOURS IN METRE

* Water features are shown in blue where they generally contain water.
* Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protection Forests are shown by green ribbons.

Contours are approximate.
A relative height, d^* , represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The stratigraphic heights and measures in this chart have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with those.

A relative height, e.g. 20r, against a wall, indicates its total depth in metres.

Unfinished levels in this chart are generally indicated in red ink.

The following notes numbers along roads and the railway are shown in slant type, e.g. 5' whereas milestone numbers are shown in upright type.

40. 7.

Tails in this area usually contain water from July to January.

Calcareous, a periodic and dependent on wind.

* Not applicable
