LIFE

### Justification for locating project in Forest land

Jio Digital Fiber requires to provide connectivity in Marwah/ Dachhan region in Kishtwar district and for that reason fiber needs to be extended from Bhandarkot to extreme regions of the district. For that purpose the best possible route is Bhandarkot – Hynen route wherein the fiber will be connected through underground and aerial cabling. The area required for underground cabling will be 0.7918 Ha and for aerial cabling the area required will be 0.0259. Since this land belongs to JK Forests, FRA requires user agencies to secure permission from JK forests. Thus in the processs, Jio Digital Fiber Pvt. Ltd. Has applied for a fresh permission from JK Forests.

Total Forest Land required will be 0.8177 Ha (0.7918 Ha for underground & 0.0259 Ha for aerial cabling)

Place: Jammu
