NOTES

The course of the Satluj River is liable to continual change. Tanks shown dry in this area usually contain water from July to March. Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals and protective embankments is required from the Irrigation authorities. The places of Antiquarian importance falling in the square numbers A/4, C/4, D/5 belong to Moghal, are protected monuments maintained by Archaeological Survey of India. A relative height e.g., 3r represents the approximate height, in metres, between the top and bottom of a steep slope.
