HEIGHTS & CONTOURS IN METRES

Water features are shown in blue where they generally contain water.	Contours are approximate.
Cultivated areas are coloured yellow.	A relative height, <i>δr</i> , represents the approximate height, in metres, between the top and bottom of a steep slope.
The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.	Wooded areas are coloured green. Scattered trees and other vegetation are in green, but

The kilometre stone numbers along railways and roads are shown in slant type, e.g. '5' whereas milestone numbers are shown in upright type, e.g. '5'.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
Tanks, shown dry, in this area usually contain water from July to November.
Unmetalled roads and cart-tracks, in this sheet, are generally motorable in dry season.
