NOTES:

heights are approximate.
 heights are in metres and show Indian sea level.
 approximate height e.g., 0r, represents the approximate height, in metres, between the top and bottom of a steep slope.

Diao and Sen Rivers are generally formed near November to June.
 The state and largest tributaries of Dalgat River have been surveyed as pointed out by the local people on the ground but have not been warned by the Collector concerned.

The forest Officer of N.W. Wintington Forest Division has been surveyed as pointed out by the local staff offices on the ground but have not been warned by the Divisional Forest Officer concerned.

The irregular height and contours in this sheet have not been adjusted to the heights of the stations, mainly because of the lack of sufficient information in accordance with them.

Contours and spot heights shown in this sheet are given in parentheses in first session.
